Homework

1. Given the below array

```
const months = [  
  "January",  
  "February",  
  "March",  
  "April",  
  "May",  
  "June",  
  "July",  
  "August",  
  "September",  
  "October",  
  "November",  
  "December",  
];
```

1. Print the current month
2. Get the index of the current month
3. Remove the summer months from the array
