Homework

1. Create a simple HTML page with the below requirements:

- it **must** have some content
- it **must** be **semantically** correct (use correct **HTML** tags)
- apply some basic **CSS**
- run a script that prints "Hello World" in the console

2. Upload the above HTML page on GitHub

- Make sure you have correctly setup git and GitHub
 - [Set up git](#)
 - [Adding a new SSH key to your GitHub account](#)
- Create a new repository and upload it
