Homework

1. Given the below variables, use all the number operators you know.

```
const integer = 10;  
const float = 5.3;  
  
// use the operators
```

1. Fix the code below in order to make the correct calculation.

```
const strNum = "10";  
const number = 7;  
  
console.log(strNum + number);
```
