Agenda

- booleans

- null

- undefined

Boolean values

- true

- false

Boolean coercion

- **booleans** are returned as-is (true / false)

- **undefined** turns into **false**

- **null** turns into **false**

- **0, -0, and NaN** turn into **false**

- **all other numbers** turn into **true**

- **0n** turns into **false**

- **BigInts** turn into **true**

- **empty string ("")** turns into **false**

- **"non empty strings"** turn into **true**

- **symbols** turn into **true**

- all objects become **true**

Null

The null value represents the intentional absence of any object value.

Undefined

The null value represents the intentional absence of any object value.

Workshop

- demo

Happy coding!
